Meet the HVAC & Process Control Team!

Sandeep Sarpal

Sandeep became involved in the HVAC industry back in 2008, when he joined a leading manufacturer of gas valves, pressure switches, flow sensors, valve actuators, building controls & other control products.

Rising rapidly through the ranks from Technical Sales to Sales Manager and Product Champion, he joined Kempston Controls in 2020 as a Commercial Manager of the Process Division.

Paul Earl

Paul's career began a few decades ago with a 4-year Electronics Apprenticeship which then led to 20 years of service in various roles in the electronics & radio/satellite communications industry.

A change of pace led to Paul working as an electrician for a small local building company. He then joined Danfoss', heating technical support team. Paul has been with Kempston Controls since 2018.

Luciano Piccini

With an Electrical Engineering BSc degree, Luciano has been engaged with the industrial sector his whole career in a variety of roles: from Account/Product manager to Plant & Production Manager.

Luciano has provided technical & commercial support for a range of products including but not limited to field instrumentation; Control (DCS/PLC), Scada, Analytical systems, VSDs,
