

Universal, Small-Form Countdown Timer

## FlexAlert from Trumeter

Available from Kempston Controls

Trumeter's FlexAlert is a lightweight, small-form timer that can be used in a range of applications where a countdown and reminder notification is required.

Easily attached using the adhesive hook & loop or cable tie mount, it will begin to count down the pre-set duration. When the time has been reached it will produce an audible alert until turned off.

- ✓ **Simple**  
Attach & Go
- ✓ **Non-Tamper**  
Pre-set Duration
- ✓ **Custom Durations**  
Endless Applications
- ✓ **Unobtrusive**  
Slim-line Design
- ✓ **Economical**  
Low-Cost, Low Impact

**In every case, FlexAlert ensures things are done on time, every time.**

### Small, Flexible, Audible

By providing an audible cue, **FlexAlert** prompts customers to replace, service or maintain a product or consumable components.

**FlexAlert** is an ideal solution to adopt in applications that have:

- A limited active life.
- No accurate way of indicating when the effective time period has passed.
- A built-in component that needs to be replaced at regular intervals, such as a filter or cartridge.
- Products with degrading performance if service or maintenance schedules are not followed.
- Product warranties that depend on compliance with operational instructions.
- End users that do not replace consumable items in the way the product was designed.
