RoHS Directive Statement

Pressure Transducers, Level & Flow switches manufactured by Gems Sensors are considered to be in Category 9. Monitoring and control instruments as designated by Annex 1A of Directive 2002/96/EC Waste Electrical and Electronic Equipment (WEEE). This category is excluded from the scope of the Directive 2002/95/EC Restriction of Use of Certain Hazardous Substances Directive (RoHS).

Directive 2002/95/EC Restriction of Use of Certain Hazardous Substances Directive (RoHS) Article 4 paragraph 1 lists the following materials:

Lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers.

Gems Sensors transducers do not contain mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers.

Gems Sensors transducers do contain lead in the form of solder to perform electrical joints, although it is our intention to use lead free solder on our industrial product range, we do not have a final implementation date at this time, although obviously it will be before the legislation becomes compulsory in July 2006.
